Subject: RE: class VI application fee

Hi Mr. Konings,

There is no fee from EPA for a Class VI application. However, states that gain primacy may possibly implement their own fee.

Thank you!

Sam Yun

Subject: class VI application fee

Hi Mr. Yun,

I have a quick question I would please like to ask. Is there an EPA permit application fee for a class VI well? If so, how much is the fee? I could not find any reference to this in the crosswalk documentation, or the EPA guidance documents.

Best Regards,

Stijn Konings

Subject: RE: Introduction meeting - Lapis Energy

Hi Mr. Konings,

Thanks for reaching out. We are not back in the office yet, but we can definitely still meet via Teams. Just let me know which of the following dates/times works best for your team and I can send an invite.

- Monday (3/21): 11am to COB
- Tuesday (3/22): 12pm, 1pm, 2pm
- Wednesday (3/23): 11am, 12pm, 1pm

- Thursday (3/24): 12pm

Attached are our draft regional Class VI documents and cheat sheet. The cheat sheet at the very least would be useful to look over before the meeting, since it may answer some questions and raise others.

Thank you!

Sam Yun

Subject: Introduction meeting - Lapis Energy

Dear Ken and colleagues,

Let me first introduce our company, Lapis Energy. We are a private equity backed full cycle CCS and Hydrogen solution company. We were born out of a merger between a group of ex-Kosmos Energy international oil and gas explorers based out of Dallas and a UK based CCS and hydrogen advisory firm called BluEnergy. We aim to identify and develop CCS projects in the LW48 and globally.

Our main target area in the US are the states under the supervision of your EPA Region 6 office. We have recently secured the CCS rights for private land in LA and are close to potentially closing another deal in another Region 6 jurisdiction.

We have already had contact with the LA DNR (Stephen Lee, Corey Shircliff, Laura Sorey), to introduce ourselves and ask questions with regards to the class VI process. They recommended we would try to arrange a brief meeting with you for an introduction and to get your perspective on any questions we have on the class VI process.

Would you maybe have time the week of the 21st or the 28th of March for a short 30–60-minute meeting? Our LW48 team is almost entirely based on Dallas, so it would be easy for us to pay you a visit in person. Alternatively, we could do it online via Zoom or Teams. Please let me know if you are available and what time you prefer?

Best Regards,

STIJN KONINGS
